Transportation Department,

It's been about a month since our last meeting, I wanted to take some time to keep you all updated on the progress we've made.

The majority of our work was devoted to the backside of your website. We created the parts that **save reservations**, **autofill the print out sheet**, and **autofill the calendar**.

We'd love for ya'll to take a look at it on your free time and give us some feedback.

<http://ytbnserver.ddns.net/transportation/calendarDemo.php>

If you do, keep in mind:

1. Some fields we have not hooked up yet
2. The Reservation Button at the bottom takes you to the Reservation form
3. Click on the Event to go to the Print Out form
4. For now we have the destination time being used for calendar display
5. For showing which car is assigned:
  - We color the event
  - And we color the text in the print out form
    - All of which is easily replaceable if you don't like it

We have a couple of questions.

1. The event date on the calendar has a end time slot, would you like this slot to be used?
  - For example:
    - I could add an **Estimated Time of Return:** field
2. Our next step is showing driver availability.
  - One way we can show this is with the field stated above
  - Otherwise we would have to add a feature to enable the user (you guys) to tell the system that the car has returned
3. Car/Driver information:
  - As of now each car's only characteristic is color.
  - Would you like us to keep any other information on the car?
  - If so could you give us a list of the cars you will use, and the characteristics you would like us to keep track of?
  - We can also add a form to
4. Lastly, Repeat clients
  - Would you like us to keep track of your clients?
  - If we did this we could autofill the reservation form with the clients info as soon as you fill out the names

If you would like to meet again to review our progress and go over our future plans, we are more than open to it. Let us know a good time and we can drive to Talladega, or we could try another skype conference.

Thanks,  
Your Development Team

Tyler,

I apologize that I haven't had a chance to respond until now. I will try my best to contact your professor regarding the excellency of the team's work. I am very pleased so far. Look forward to meeting with you all on Thursday.

Thank you so much Mrs. Reeves, that is exactly what we needed!

I've gone ahead and updated the registration form with your instructions, and we are currently working towards a calendar skeleton.

Calendar may take some time to implement because of all the moving parts but we've brainstormed some idea's and will keep you updated on our progress.

As for the form I'll have Taylor connect the updated version to the server for you to view. If you have any suggestions/ideas regarding any part of the system please don't hesitate to throw them my way.

Also, you may notice I've added some graphics to the newest form, these are really just place holders. I'd love to update new images of your choice. If you have any logo or background you'd like represented please send.

Look forward to Thursday!

Thanks,

-Tyler

Zoe and I reviewed the prototype. It looks very good, we like it. Here are a few things that we noticed that would need to be tweaked. Donte will email your Professor he just wanted me to look at the prototype first. We look forward to seeing you guys and thank you for your assistance. I might not be making a lot of sense so if you have questions or I have confused please let me know. Thanks?

1. We will need a calendar on the open page which we could click the date and see what appointments have been scheduled and which driver and vehicle are being used for the appointments. This would make it easy for us to see which drivers and vehicles are in use and what is available.
2. On the actual appointment sheet on the Disability drop down box needs to have Blind, Low Vision, Deaf, Hard Hearing of Hearing (HOH) and Deaf/Blind as selections.
3. In the Pick Up and Appointment Time slot can we remove the drop down box and allow us to type in the actual time of pick up and appointment time. We have such a wide range of times that we pick up. For example it might be a 9:20 pick for a 9:40 appointment.
4. Instead of have return client we need a yes/no drop down box for New Patient and a yes/no drop down box for assistance with paperwork.
5. We also need a blank on the appointment sheet for the drivers name and another blank for the vehicle name

To answer your questions for next cycle:

1. Yes a calendar would be very beneficial and necessary
2. Real time car and driver availability could go hand and hand with the calendar. If we could click a date and the appointments for that date are listed under the selected date. The way we do it now is we click on the date on Microsoft Outlook and the appointments are listed out beside the specific pick up time. The appointments are color coded according to the color the specific vehicle is labeled. The appointment is labeled as follows: "Zoe Rose for John Smith, Dr. Joiner, Birmingham" Zoe is the driver and John is the client. The car we use is 103 and its colored Green. So we know that car 103 is going to Birmingham to Dr. Joiner's office and Zoe is the Driver and John Smith is the client.
3. Scenario: John Smith calls Zoe or Jennifer and says he needs to go to Dr. Jones in Birmingham on 9/30/15 at 10:00 a.m. John provides me with all of his information including emergency contact name and number, pick up address and phone number, appointment time and date, Destination address and phone number, reason for appointment, if he is a new patient or needs assistance with paperwork. We refer to our hard copy (paper) calendar to see if a driver and a vehicle are available for 9/30/15 at 10:00 a.m. If so we write on the paper calendar his name, appointment time, pick up time, pick up location, destination, driver and vehicle. We then go to Microsoft Outlook calendar and select the date we need, enter the pick up time, select the vehicle, choose a driver, complete the appointment sheet in the body, print and put sheet in drivers folder to date and initial. The driver dates and initials the sheet and makes a copy for our records.

I think going to talladega would be great for us to see your system first hand. Next Thursday or even Tuesday should be good with Aymeric and I, I know Taylor works every day around three. But we're meeting tomorrow morning, can I get back to you then?

Would either Tuesday or Thursday next week at 3:30 be good times?
